

“...a true masterpiece of electronic music that shows the talent of a very gifted composer who is sure to turn heads with this release.” -Craig Harvey, Movement Magazine

If emotion could be translated into music, this would be the result. Listening to atom(bang) is a sensory experience that fills the mind with dreamlike landscapes and warm aural terrain. Melodic synth lines and sweeping pads weave throughout infectious, addictive rhythms that keep your body and mind in motion. Each atom(bang) song you hear brings you closer to the realization that a larger story is unfolding behind the scenes...

LATEST RELEASE: THE BIG BANG

The Big Bang (UPC 837101426510)

1. Running Out Of Time (3:26)
2. Poseur (3:38)
3. Insomnia (3:42)
4. Johnsong (4:50)
5. Intermezzo (4:44)
6. Alone (2:43)
7. EhhDawh (4:09)
8. Delayed Reaction (4:48)
9. Duality (4:58)
10. Drama Tauma (4:04)

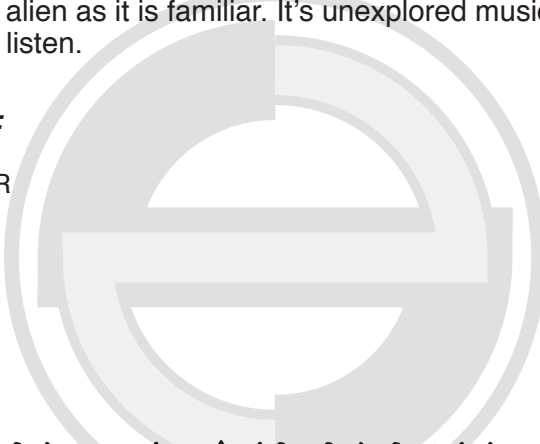

Like a soundtrack to the movie you saw somewhere in your dreams, The Big Bang is a roller-coaster ride through the subconscious of a storyteller.

While tipping the hat to a wide array of musical styles, atom(bang) explores a new kind of composed, evolved electronica - then redefines and explores new boundaries for the genre. With infectious grooves and epic, haunting melodies, **The Big Bang** is an aural experience that's dark, thought-provoking, absorbing and catchy. It's an album that's as alien as it is familiar. It's unexplored musical terrain that seems like meeting a long-lost friend each time you listen.
